RE: RESPONSE TO PENDING ITEM FOR SITE CLOSURE
392 FALLON ROAD, PETALUMA, CALIFORNIA
EBA Project No. 01-893(27)

Dear Mr. Ives:

EBA Engineering (EBA) is pleased to present the following response to Pending Items required for site closure, which were requested by the County of Sonoma Department of Health Services – Environmental Health Division (CSDHS-EHD) in a letter dated February 18, 2005.

PENDING ITEMS – DISPOSAL RECEIPTS FOR DRUMS OF DRILLING SPOILS AND EQUIPMENT RINSATE

Drilling spoils generated during the August 2002 and April 2003 site work was stockpiled with the soil removed during the August 10 and 11, 2004, excavation. The soil was subsequently characterized and transported under manifest to Keller Canyon Landfill in Pittsburg, California, for disposal. Disposal documentation was included in the *Report of Investigation, Excavation of Petroleum Impacted Soil* submitted to the CSDHS-EHD on September 24, 2004.

Equipment rinsate water generated during the drilling activities performed prior to the August 2004 excavation activities was stored in 55-gallon drums on-site and subsequently used to moisture condition the soil removed during the aforementioned excavation activities.

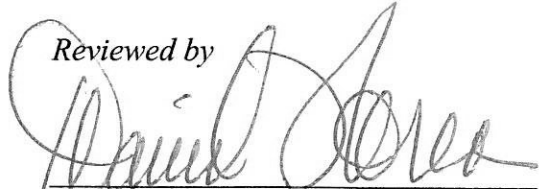

CONCLUSIONS AND RECOMMENDATIONS

Based on the information presented herein and the results of past investigative and remedial efforts at the project site, EBA recommends the site investigation be closed.

If you should have any questions regarding the information presented herein, please do not hesitate to contact this office at (707) 544-0784.

Sincerely,
EBA ENGINEERING

Paul Nelson
Staff Geologist
